SIERRA CLUB ENDORSES KEVIN BECKNER
Kevin Beckner earns the support of leading environmental group

TAMPA: Kevin Beckner can now add the Sierra Club to his growing list of endorsements and supporters. The local chapter of the nationally recognized leader of environmental issues has thrown their full support behind Kevin Beckner's campaign for County Commission against his opponent Brian Blair.

"We believe that the top issues facing our county today are how we plan for the future and spending our tax dollars wisely. Kevin understands the need for meaningful, long-range planning that respects and preserves our environment while focusing on building sustainable, livable communities that have accessible, affordable public transportation. His education, work experience and demeanor enhance his ability to work with other board members. Beckner is a good listener who values inclusion and citizen participation in local government, a cornerstone of our democracy," stated Beverly Griffiths, Chair of the local Tampa Bay Sierra Club.

"It is an honor to have earned the support of the Sierra Club" stated Beckner. I will proudly stand with them as we work together to delicately balance growth with respect to our environment and natural resources in Hillsborough County" stated Beckner.
